

Gene Transfer Center

Program Overview

PureTek Gene Transfer Center

Exceptional quality, strict biosecurity, excellence in customer service...all at an affordable price. That's what matters to PureTek Gene Transfer Center customers and it's what matters to us.

The experienced staff at our gene transfer center cares for your business as if it were they're own. In fact, our customers get the same genetic products we use on our own farms.

We all know how important quality and reliability are to the success of a swine breeding operation and we refuse to compromise our commitment to providing the best customer service in the industry.

Open communication and ongoing follow-up are essential to building sustainable, long-term, successful relationships. It's what matters to our customers and what we expect from ourselves.

Health/Biosecurity

The health of your operation matters to us. Weekly testing is conducted on both blood and oral fluids.

Strict bio-security protocols are followed when introducing new boars to the center, processing and delivering semen, and receiving supply shipments.

Location

Customers can source top-quality PureTek semen through company-owned **Pine Creek Gene Transfer Center**, Fowler, Ind., or through our carefully selected PureTek affiliate centers. We'll work with you to determine the center that best serves the needs of your operation.

What Matters to You, Matters to **PureTek**

Gene Transfer Center

Program Overview

Quality

Our Quality Control Program has been developed by Genes Diffusion, a company with more than 40 years of experience in Quality Control and Boar Stud Management.

Our program allows for routine monitoring of product and regular monitoring of our production equipment and procedures.

Fast Delivery

Same-day delivery routes are in place at each center and as well as next day air delivery. Same-day delivery drivers follow strict bio-security protocols to protect the health of your animals and

How to order
