PureTek D-CLASS MQ Line

Outstanding growth performance with a focus on meat quality

PureTek's D-CLASS MQ Lines produce commercial progeny excelling in efficient lean growth, survivability, consistent performance and maximum-value pigs marketed. The result: Outstanding carcass cutability and impressive pork quality.

PureTek D-CLASS MQ Line boars are selected on the CTSI for:

- **Efficient Lean Growth**
 - Intramuscular Fat (IMF)
 - A Meat Quality Metric
 - Growth Rate
 - Backfat Depth
 - Loin Depth
 - Feed Efficiency
- CTSI allows for identification of sires whose progeny excel in a commercial environment
- Purebred evaluation and testing results are also used in the selection process

Key Metrics	Group Average	91-9 Top Performer
Days to 250 lbs.	148	144
Intramuscular Fat (IMF)*	3.7	4.6
Back Fat	1.7	1.66
Pounds of Lean	1.7	2.8
Terminal Sire Index	138.1	149.9
Loin Muscle Area	7.8	9.64

*Pork sold in grocery stores typically ranks a 2.0 IMF score.
